CODE OF OPERATIONS

NOTICE TO SHIPPERS

PURSUANT TO PART I SECTION 1.3 OF THE CODE OF OPERATIONS

MODIFICATION

Various: European Network Code related modifications: A062, A063, A066, A067 & A068

COMMISSION'S INSTRUCTION

The Commission hereby approves modification of the Code published pursuant to Section 13(1) of the Gas (Interim) (Regulation) Act 2002, as amended, in line with the legal drafting circulated in relation to Part G 'Technical', Part H 'Operations', and Part I 'Legal & General'¹ as attached to this Direction, with an effective date of 1 October 2015.

The Commission notes that, with the exception of Section 2A of Part H which relates directly and solely to Code Modification A067 '*Congestion Management Procedures (CMP)*', the amended Code drafting for Parts G, H & I do not directly and solely relate to any individual Code modification proposal. Rather, the drafting reflects consequential changes to the Code which arise from a combination of a number of European Network Code related modification proposals which have been included in other parts of the Code and approved separately by the Commission e.g. the core requirements of Code Modification A062 '*Capacity Allocation Mechanisms (CAM)*' have separately been incorporated in Part C '*Capacity*' and approved by the Commission accordingly.

The Commission also notes that the Transporter shall in due course submit to the Commission an updated and consolidated version of the Code of Operations reflective of all approved modifications with effective dates up to and including 1 October 2015.

Signed:

A handwritten signature in black ink, appearing to read 'Aoife McEvelly', is written over a horizontal line.

Aoife McEvelly

Commissioner for Energy Regulation

Issue date:

29/9/15

¹ Note that the approval extends to the approval of the 'Interconnection Points' document as consulted, which comprise clause specifically relating to Interconnection Points and which shall be incorporated within Part H of the Code in due course.
